

Annual Road Maintenance Program 2024-25

This document was last updated on **15th January 2025**. We aim to update the PDF on the website every month during the program.

We are still awaiting confirmation of construction dates for our Full Resurfacing program. We will update this document once this information has been received from our contractors.

Residents on each road will be contacted directly prior to works beginning with exact dates, and advanced warning signs will be placed in the vicinity of the works to keep residents informed.

About the program

Each year, Wokingham Borough Council invests millions of pounds repairing roads across the borough through its annual maintenance program. Roads are assessed and monitored throughout the year using a range of techniques, which informs the plan for the coming year.

We have four types of treatment and resurfacing that we use:

- Full resurfacing is a more extensive treatment, which involves removing layers of a worn-out road surface and replacing this with new material.
- Surface dressing adds protection to the carriageway surface, sealing it from water while also enhancing its skid resistance. This protection can extend the life of the carriageway surface by up to 10 years.
- Asphalt Preservation is a cost-effective preventative treatment, which adds protection to the carriageway surface. A bituminous sealant is applied to the road surface, which seals cracks and prevents pothole formation. This protection can extend the life of the carriageway surface by up to 5 years.

We will also be carrying out some additional works on footpaths and roads this year. This document contains the planned works for 2024-25, although dates are subject to change.

Surface Dressing

Reference	Road Name	Ward	Start Date	End Date	Status
9567	U7872/2 - COLEMANS MOOR ROAD (Dead end off Sandford Ln, all)	Loddon	2025/26	2025/26	Postponed
